Problems Encountered:

Manager I

Responsible Parties: Case Manager II and Case

A challenge encountered this quarter is the COVID-19 global pandemic which resulted in a lot of restrictions and formulations of new organizational policies in accordance with Guam regulations. Intake screening and assessments for new clients were limited due to social distancing measures. Intakes completed on an emergency basis were conducted via telephone or video/web conference. Families who had plans in place to gain physical custody of their child/children are now facing more hardships such as

financially stability due to loss of employment, unable to complete required self-help courses, and other challenges that has resulted in the extension of shelter stay for youth.

Future Plans:

The Case Management and Clinical department continue to develop corrective action plans to address several gaps in services such as improving placement time periods, monitoring of case management activities, and case updates. In light of COVID-19, Sanctuary is working on improving its technology plan to include counseling sessions conducted via web-conferencing. Sanctuary continues to partner with agencies such as Child Protective Services and the Department of Youth Affairs by increasing day to day communication to discuss ways to better serve clients in shelter. To assist with these plans, we continue to increase our staff capacity.
